EDUCATION

- **Pune Institute Of Computer Technology** Pune, India
BE-Computer Engineering - CGPA: 9.11 August 2022 – June 2026
Coursework: Object Oriented Programming, Data Structures, DBMS, Computer Networks, Operating Systems
- **Vidya Valley Jr College** Pune, India
12th - Science - Percentage: 83.5% April 2020 – April 2022
- **City Pride School** Pune, India
10th - CBSE - Percentage: 94% April 2012 – April 2020

SKILLS SUMMARY

- **Languages:** Python, C++, JavaScript, Java, SQL
- **Frameworks:** React, Next.js, Node.js, Express
- **Tools:** VS Code, Jupyter, Figma, GitHub

EXPERIENCE

- **Siemens Digital Industries Software India** Pune(OnSite), India
Summer Intern (Link) June 2025 – August 2025
 - Set up **Jenkins CI/CD** using **Helm** on a **Kubernetes Cluster**, enabling scalable, automated build pipelines with dynamic agents.
 - Replicated the setup on **AWS EC2 instances**, creating a cloud-compatible, consistent master-agent architecture.
 - Optimized the prototype for **cost-efficiency**, **portability**, and **scalability**, simplifying future deployments and minimizing infrastructure overhead.
- **Fire AI** Remote
Software Development Intern (Link) July 2024 – September 2024
 - Developed dynamic UIs using **TypeScript** and **React.js**, integrating **Material-UI (MUI)** and building a **custom UI library** to ensure design consistency.
 - Built a fully functional **dashboard** tailored to client needs by engaging in **client meetings**, iterating on feedback, and implementing features.
 - Demonstrated communication and **project management** skills using **Jira Software** to coordinate tasks and ensure timely delivery.

PROJECTS

- **theInterview:** Link Developed a web platform to compile and showcase interview experiences, helping juniors prepare for placements. Used **Static Site Generation (SSG)** and **Incremental Static Regeneration (ISR)** for fast, optimized performance across pages. Gained **7500+ total impressions**, including 1500+ in the first 2 days.
Tech: Next.js, MongoDB
- **WedWorks:** Link A full-stack event and hospitality management platform used to manage large wedding events end-to-end. Built workflows for guest list upload (**including bulk XLSX import**), resort room selection, automated guest-room transport allocation, and live dashboard insights. Added admin tools for RSVP tracking and one-click downloadable reports across guests, rooms, and transportation. **Designed a relational schema ensuring fast, consistent queries across thousands of entries.**
Tech: Next.js, Node.js, PostgreSQL (Supabase)

ACHIEVEMENTS

- Secured **99.28 percentile** in MHT-CET with an **All Maharashtra Rank of 1102**.
- Achieved **2-star rating on CodeChef**, showcasing consistent problem-solving and algorithmic skills.
- Merit Certificate Holder for Mathematics in 10th

EXTRACURRICULAR EXPERIENCE

- **Treasurer** PICT ACM Student Chapter (PASC)
Handled all financial transactions for a 1200-member organization.
Highlight: Directed financial strategy for hackathons and workshops. Led cross-functional coordination with the tech team to automate payment verification processes using machine learning pipelines.
