

Bachelors in Engineering
Computer Engineering
SCTR's Pune Institute Of Computer Engineering, Pune

EDUCATION

Degree/Certificate	Institute/Board	CGPA/Percentage	Year
BE.	SCTR's Pune Institute Of Computer Engineering	9.0	2025
Senior Secondary	Maharashtra Board	83.33%	2022
Secondary	CBSE Board	97.0%	2020

EXPERIENCE

• iMocha

Intern

Dec 2024 – Jun 2025

- Built and deployed an **Aptitude Analysis Utility** that accepts questions with multiple options, leverages **LLM** to validate answers, and generates explanations with required metrics.
- Developed a **Scraping Utility** using **Selenium WebDriver**s for automated navigation of job pages and **BeautifulSoup** for extracting job-related data, followed by **LLM-based trend analysis** and classification into Excel format.
- Created a **CodeStub Utility** to provide coding frameworks (similar to LeetCode/HackerRank) supporting **14 programming languages** including Scala, Lua, and C#.
- Managed **deployment pipelines** on **DigitalOcean** and GitHub, designed blueprints, and ensured smooth deployment processes.

PROJECTS

• PFISOC Website

PICT Financial Club's website project

- Designed and deployed a full-stack club website with a dynamic blogs platform.
- Developed RESTful backend APIs using **Node.js**, **Express.js**, and **MongoDB**; implemented database querying and CRUD operations.
- Built a scalable frontend in **React** (Next.js), integrating Tailwind CSS for responsive UI and dynamic routing for blog pages.
- Automated deployment: backend on Render, frontend on Vercel; ensured seamless CI/CD and environment management.
- Structured backend for maintainability, enabling easy future enhancements and developer onboarding.

• Restaurant Management System

DBMS project for comprehensive restaurant operations management

- Developed full-stack restaurant management system with customer ordering, billing, and table allocation.
- Backend implemented with **Next.js API routes** and **MySQL database**; frontend in **React**.
- Designed relational database schema with normalized tables for users, orders, menu items, and table management.
- Implemented features including automated billing generation, and payment status management.

SKILLS

- **Programming:** Java, C++, SQL
- **Frameworks:** Next.js, ReactJS, ExpressJs
- **Version Control:** Git, GitHub
- **Database:** MySQL, MongoDB
- **Relevant coursework:** Software Engineering, Data Structures and Algorithms, Database Management Systems, Operating Systems, Computer Networks, Object Oriented Programming, FIX protocol

ACHIEVEMENTS

• NISM-Series-VIII: Equity Derivatives Certification

Cleared SEBI-recognized trading and compliance exam

• Technical Head & Founding Member – PICT Finance Society

Led ETF awareness workshop on 1st Feb 2024; helped structure the club

• Finance & Tech Blog Author – Medium

Write finance, tech, and current affairs blogs on Medium

• Runner-up, Intraparicharcha – PICT DebSoc

Secured 2nd place in DebSoc's annual flagship event based on debate and public speaking skills

• Volunteer, TEDxPICT

Part of curation team; helped evaluate and onboard speakers for 2023

• Published research paper

Intelligent Document Processing (IDP) in Document Management – 2022

• DSA Problem Solving

*Solved 400+ problems on CodeChef and LeetCode / Max ratings: **1538 (CodeChef)**, **1563 (LeetCode)***
